Good evening,

I apologize for taking awhile to send these.

**Ex. 6 Personal Privacy (PP)**

**Ex. 6 Personal Privacy (PP)**

In discussing providing the slides with Tamara Tal, she asked that I not share that data. Those studies are currently in clearance within EPA and should be published within the next 6 months. I have included all other slides.

I also promised to send some information on the new US EPA/ORD structure. I have not forgotten. I hope to have a chance to put that together this next week and will send.

Anna, I understand you asked Mark Strynar about the list of 31 PFAS. That list has not been widely distributed, but as explained during my talk, that was the initial list identified by an EPA Intra-Agency working group charged with identifying high priority PFAS based on known contamination sites or common usage, as well as some available data. The list is included in the attached slides. The green highlighted PFAS are those currently being worked on by NCEA and the Office of Water for toxicity assessments. The draft assessments for the GenX chemicals and PFBS are already out (RfD included in slides, but these are only draft and may change).

Angela, I would appreciate you distributing these to other students that might be interested.

Let me know if you have any questions.
